SAAVI COMPUTECH

Complete IT Hardware & Support Solutions

Universal
Enterprises

About Us

Saavi Computech is an IT hardware and solutions provider offering laptops, desktops, networking solutions, and annual maintenance services to schools, colleges, and corporate organizations.
The organization is backed by over 5 years of hands-on experience in the IT hardware and support industry.
Our current operating firm, Universal Enterprises, was established 2 years ago, after consolidating experience gained through earlier business operations in the same domain.
To create a focused and specialized identity for institutional and corporate IT solutions, Saavi Computech was launched in 2026 as a dedicated IT brand under Universal Enterprises.
With strong technical expertise and practical field experience, we emphasize reliable products, prompt service, and long-term support, making us a dependable IT partner rather than just a product supplier
